Art Unit: 2173

DETAILED ACTION

1. Claims 1-25 are pending.

2. The examiner telephoned the applicant's attorney, Mr. David L. Fehrman (Reg. No. 28,600), on 30 March 2007 and left a voicemail inquiring whether the applicant desired to elect a restricted group for examination. However, no response has been received.

Election/Restrictions

- 3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 14 and 20, drawn to changing the operation mode of display components, classified in class 715, subclass 716.
 - II. Claims 2-3, 15 and 21, drawn to changing display components to small-scale display, classified in class 715, subclass 800.
 - III. Claims 4-7, 16 and 22, drawn to changing the location of display components, classified in class 715, subclass 799.
 - IV. Claims 8-9, 17-18 and 23-24, drawn to manipulating icons, classified in class 715, subclass 835.
 - V. Claims 10-13, 19 and 25, drawn to display and editing of musical notes, classified in class 084, subclass 483.1.

Art Unit: 2173

Inventions I, II, III, IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as allowing users to control the mode of operation of components displayed on the screen via user input instructions. In the instant case, subcombination II has separate utility such as resizing components on the display screen in order to increase viewing efficiency, i.e. prevent overlap, ensuring objects fit on the screen, etc. In the instant case, subcombination III has separate utility such as moving components on the display screen in order to allow components that are of higher z-order or priority to be in focus and easily viewable by the user. In the instant case, subcombination IV has separate utility such as using an iconic array to represent and perform data and instructions. In the instant case, subcombination V has separate utility such as providing a musical score sheet for creating and editing musical notes/tones. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Art Unit: 2173

5. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02) and the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ting Zhou whose telephone number is (571) 272-4058. The examiner can normally be reached on Monday - Friday 7:00 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Cabeca can be reached at (571) 272-4048. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
